

Creating records can get very complicated for **Agile PLM** users, especially when records contain hundreds of fields that can vary based on business unit, product line or other factors. With **UI Wizard for Agile PLM**, companies can simplify this by guiding users through a set of relevant questions and automating the creation of Agile records.

UI Wizard for Agile PLM can:

- Capture required data for creating any record(s) in Agile PLM
- Guide the data flow for creation of multiple records
- Include validation rules for acceptable input values
- Determine the appropriate list of values for each data attribute

Value & Benefits

Speed

- When you've got a large volume of items to create/modify
 - Wizard leads the user through the complexities
 - Templates can be defined requiring even less time
 - Auto-fill attributes based on selections made

Accuracy

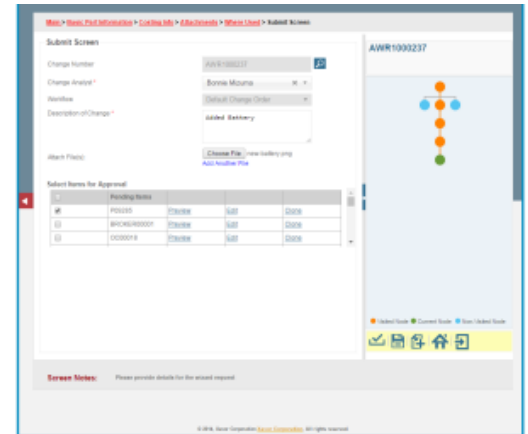

- When you want to minimize errors
 - Data is validated in real time
 - Can't move to the next step until the correct data is entered

Control

- When you've got a large volume of items to create/modify
 - Wizard leads the user through the complexities
 - Templates can be defined requiring even less time
 - Auto-fill attributes based on selections made

Ease of Use

- When you want to minimize training
 - Hover over context sensitive help
 - Agile's not always intuitive as to what data is required under what conditions
- When there are many possible attributes
 - Say there are 150 possible attributes to fill in and only 15 are required for certain scenarios- there may be thousands of permutations
 - Which attribute do I have to fill in?

UI Wizard can also be used with the following Agile PLM objects:

- Augment Quality processes
- CAPA
- Problem Report Audit
- Risk
- Augment Change Processes
- Change Order
- Deviations & Stop Ships
- Material Review Boards
- Regulatory Submission Determination
- Augment Investigation Processes
- Device/Failure Analysis
- Root Cause Analysis
- External Collaboration(s)
- Customer input/output
- Supplier Collaboration

About GoSaaS, Inc.

GoSaaS helps manufacturing companies implement PLM related software solutions better, faster and cheaper than traditional System Integrators (SIs). GoSaaS is different because of deep investments in fundamental in-house technologies and an innovative operating model built from the ground up for the digital age. GoSaaS is one of the few truly Digitally Transformed System Integrators. **Visit us at: gosaas.io**
