

## Cloud PLM Add-ons

Make your Cloud PLM experience even better.  
Starting at \$200/month.

### EG&C

RoHS, REACH, Customer Specifications, etc., are automated and simple using Artificial Intelligence. Includes add-on compliance outsourcing services.

### Excel Add-In for Cloud PD/PDH

Search/bulk update BOMs and AMLs from MS Excel.

### UI Wizard

Create wizard-based apps on Agile objects from a powerful admin interface without any code.

## Migration & Integration Tools

Migrate, Archive and Integrate data.  
Starting at \$200/month.

### GoSaaS Integrator

Integrate your PLM with any other system. Includes SaaS ERPs like NetSuite, Dynamics ERP, ECAD/MCAD tools and all major on-premises ERPs. Only pay for what you use.

### GoSaaS Migrator

Migrate data from legacy PLM to Cloud PLM, including metadata like subclasses, workflows and actual data.

### GoSaaS Archiver

Keep historical data needed for regulatory and other purposes in our Cloud Archiver instead of bringing it to Cloud PLM.

## Services

GoSaaS is transforming PLM services.  
Implementations starting at \$10k/module.

### Implementation Services

PLM implementation methodology perfected over hundreds of implementations, revamped for Cloud PLM. Available for IM, PD, PDH, PPM and Quality.

Starting at \$10k per module.

### Migrate from Another PLM

The most automated migration process in the industry.

Starting at \$10k.

### Maintenance & Support

Application support for admins and end users.  
Starting at \$8/user/month.

## Essential Tools

Make your PLM users more productive.  
Starting at \$200/month.

### Assist+

Presents mouse-over hover help (tool tips) text for any field.

### ECO Dashboard

Reduce clicks to find ECO, view affected items and take actions from one screen.

### Excel Add-In for Agile PLM

Search/bulk update BOMs, AMLs and create changes from MS Excel.

## Advanced Tools

Automate common validations, data entry and reports without any code.  
Starting at \$200/month.

### Automation Engine

Point and click UI to develop PXs in Agile without a single line of code.

### UI Wizard

Create wizard-based apps on Agile objects from a powerful admin interface. Again, without a single line of code.

### xReports

Build complex reports on Agile data by combining multiple searches in Agile without any code.

### Integration

Robust ERP integrations.

## Services

GoSaaS is transforming PLM services.  
Implementations starting at \$10k/module.

### Upgrade to On-Prem or Cloud

The most streamlined and automated upgrade and migration process in the industry.

Starting at \$10k per module.

### Health Check

In-depth technical health check that will open your eyes and improve your Agile PLM performance and reliability drastically.

Starting at \$5k.

### Maintenance & Support

Platform and application support for admins and end users.

Starting at \$8/user/month.
